Course Enrollment on JAGU

There are two primary ways to find and enroll in a course on JAGU. Upcoming and current courses are typically displayed on the homepage of JAGU via the scrolling marque. Other courses, to include self-enrollment courses and the course catalog, can be found under the Enrollment or Self-Development tab.

Please note that many courses require an access code that can only be obtained by the course manager upon registering for course, typically via ATRRS. Once registered, JAGU enrollment instructions will be sent to the e-mail address associated with your registration profile.
